MAKING SOLUTIONS WORK FOR YOU
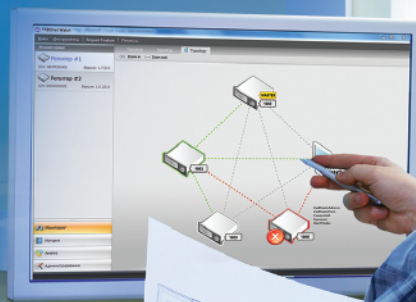

Solution for administering digital radio systems

TRBOnet.Watch is a client-server Windows application that monitors all traffic on Motorola MOTOTRBO™ IP Site Connect, Capacity Plus systems or single repeaters. It displays transmitted GPS, ARS, Voice, Text Messages, System and User data with RSSI, source and destination radio ID's, Peer ID's. TRBOnet Watch helps to balance a channel loading, define and solve problems in a radionetwork.
